

Intumescent Monthly

www.albi.com

A monthly report of products, projects and ideas for Albi fireproofing applications

Albi/PPG Product Training

The training sessions continue. In the last month, training sessions have been conducted in **Detroit, MI, Cleveland, OH, Anaheim, CA** and the PMC facility in **Little Rock, AR**. Training sessions were conducted in **Des Moines, IA** and **Omaha, NE**, where we also approved contractors in the application of Albi Clad TF and FP. We will be in **St. Louis, MO** the week of August 25. If you are interested in hosting an Albi/PPG training session, please contact your Zone Manager.

Des Moines, IA

Omaha, NE

Company News

Sales are continuing on a positive track with substantial orders from the **Quincy, MA, Des Moines, IA** and **Burlington, VT** stores. If you have a fireproofing application, please let us know about it. We will support you throughout the entire process.

Product News

We receive more questions about primers and topcoats than any other subject. Here is the current list of PPG primers that are compatible with Albi Clad TF and 800. If there are any primers not listed, supply us the product information and we will determine if it's compatible with Albi products. Albi Clad FP requires a wood primer.

Albi Clad TF

Aquapon 35 Series 95-1*
Amercoat 370
Amerlock 2 VOC*
Amercoat 5108
SpeedHide Supertech 6-725
Pitt-Tech 90-712 Series
Multiprime 94-258/94-269

Albi Clad 800

MetalCase Shop Coat 94-231 Series
Aquapon 35 Series 95-1
Pitthane 35 95-850 Series
Pitt Guard DTR Epoxy
Amercoat 71TC
Multiprime 94-258
Amerlock 2
Amerlock 400
Amercoat Dimetcote 9HS

*Scuff surface prior to application of Albi Clad.

As a general rule, most PPG topcoats are compatible with Albi Clad TF, FP and 800 when they are fully cured. Check with your Albi rep regarding cure times. We will help you come up with a primer-intumescent-topcoat system.

Case History

Job Name:	Ingersoll Square
Contractor:	J. C. Tolland
Job Location:	Des Moines, IA
Job Date:	June 2014
Product Used:	Albi Clad TF

Description of Job:

Ingersoll Square is a commercial retail and condominium complex. Approximately 500 gallons of Albi Clad TF was applied to the exposed structural steel on the first floor. This type of multi-use structure is indicative of what's being done in Des Moines as part of the revitalization of the city.
